Deployment:

Link to Deployment Environment: <https://dashboard.heroku.com/apps/disastertrackerco>

Link to Project: <https://disastertrackerco.herokuapp.com/home>

The app was deployed through Heroku. Features and changes would be pushed to the Github repository for local testing; after local testing was successful, these git changes would be deployed through Heroku's git deployment feature. Once deployed, the current state of the project would be viewable through the link to the project provided. One can access/run the app by simply clicking on the link to the project.
